

Security Vulnerabilities Discovered In Adobe Reader And Flash Player

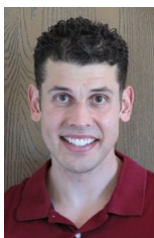

Adobe has released critical updates for Adobe Reader and Flash player that address recently discovered security vulnerabilities. These vulnerabilities can cause the application or system to crash when a victim inadvertently visits a website serving malicious flash content or opens a malicious PDF file, and then potentially allow an attacker to take control of their system. It is advised to update these programs immediately.

To install the latest versions go to:

for Adobe Flash Player: <http://get.adobe.com/flashplayer/>

for Adobe Reader: <http://get.adobe.com/reader/>
